

Paau Share

**The UK's shared-depot network
for commercial fleet EV charging**

Transport East Webinar, Nov 2025

2020:

“Where can we charge our electric cars and vans?”

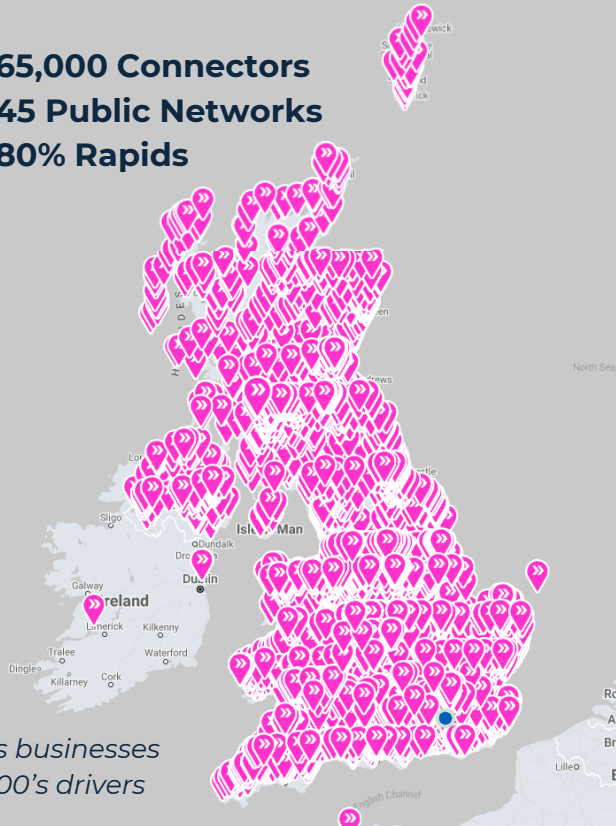

Paua Mission Statement:

“To simplify Electric Vehicle charging to enable more people into more electric vehicles, faster”

Paau Today:

Public car & van charging locations:

- >65,000 Connectors
- >45 Public Networks
- >80% Rapids

2025:

“Where can I charge for less?”

“I need more secure places to charge.”

“Where can I charge my truck?”

...

“Paau PINS” Project (2024)

(***P**rivate **I**nfrastructure **N**etwork **S**olution*)

What?

Demonstration of private charging infrastructure sharing between fleets

Why?

Large EVs | More Locations | Lower Cost | Higher Utilisation

How?

Matchmaking | Sharing Agreements | Charging | Payments

**Funded by
UK Government**

For Fleets (*Site Visitors*)

» More locations to charge

- Greater route flexibility for fleet operators
- Shorter range vehicles (lower cost) become feasible
- Secure & private locations

» Lower cost charging

- Generally cheaper than charging in public
- More routes become feasible

» eHGV charging

- eHGV operators often install their own chargers
- Makes up for lack of public options for eHGVs
- Utilisation is often low at private sites

For Hosts (*Site Operators*)

» New revenue

- Earn money when chargers are not needed
- Minimal cost to implement (low admin)

» Improved charger ROI

- Improved business case for infrastructure rollout
- Higher utilisation / asset sweating

» Kudos

- Lead from the front and accelerate the EV transition!

How hard can it be?

eHGV operator (Fleets)

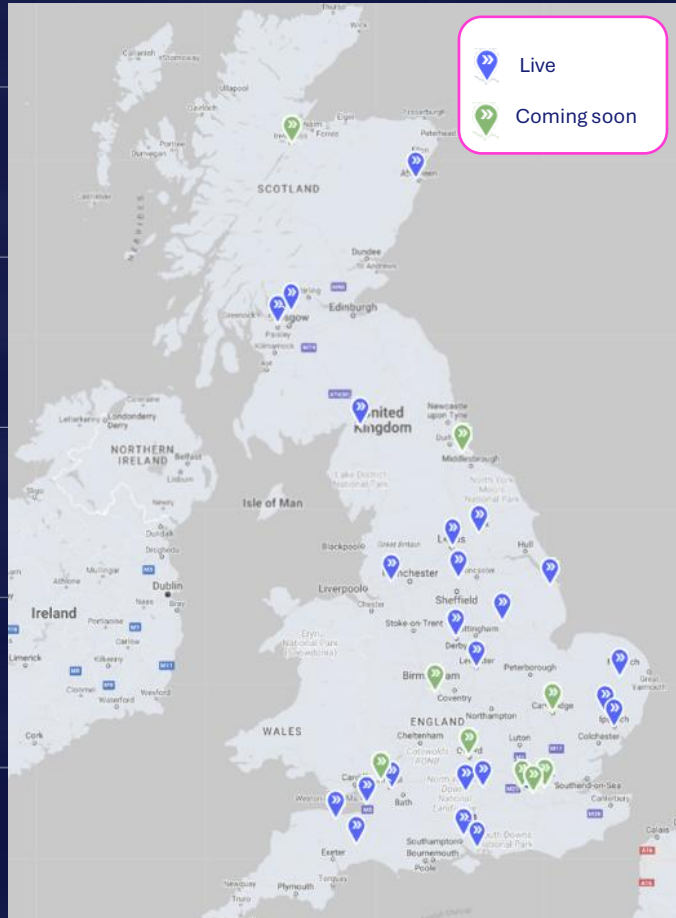

- Identifying sharing partners
- Contracts and Commercials
- Communicating site info to drivers
- Site access management
- Site procedure briefings
- RFID card / Token management
- Charging operations & data
- Billing & Invoicing
- Issue resolution / mediation
- ...

Depot operator (Hosts)

Paau Share

- **>20** Shared-depot charging locations live
- **>100** Commercial fleets registered
- **>40** Host organisations engaged
- **>300** Private sites under assessment
- **>4,000** Private connectors under assessment
