

Transport Decarbonisation Demonstrators

Sophie Randall

Innovation Lead – Mobility and Cities

The UK's innovation agency

UKRI

**We are the UK's Innovation agency.
Our mission is to help businesses grow.**

Background info

Competition aims

These projects will demonstrate innovative solutions which support the decarbonisation of transport systems within a local area.

The aim of this competition is to support innovative R&D solutions that can demonstrate the potential to:

- reduce transport carbon emissions in local areas
- facilitate collaboration between Local Authorities (LA) and businesses
